**PROJOB
WORKWEAR
COLLECTION**

**20
24**

A construction worker with a beard, wearing a grey hoodie, black pants, and a neon green safety cap with goggles, is working on a roof. He is using a power tool, possibly a circular saw, to cut through wooden planks. The background shows trees with autumn foliage. The text "WHEN DUTY CALLS. WE ANSWER." is overlaid on the image.

**WHEN DUTY CALLS.
WE ANSWER.**

AUTOMATIC STORAGE, SWEDEN

ERGONOMICS, FUNCTION AND QUALITY. DID WE MENTION LOGISTICS?

When pointing out our main values, we always talk about the big three: Ergonomics, Function and Quality. And that is still correct.

But one thing is so much in our genetics that we rarely mention it. Yet it may be one of our strongest advantages, at least if we ask our retailers: A very good inventory. We do not only design good workwear, we store the goods in very high volumes too, both in Scandinavia and on the European mainland and UK where we have our largest markets. We are also keeping stock in Canada for the North American market. Our ability to deliver over the world is generally extremely high. Take that part of our competence to mind too.

As we entered 2024, a lot of news were in the pipeline. In Düsseldorf in October, at the International A+A fair for workwear and personal protection equipment, we presented our news for the coming season and had a very good reception from the international market. Regardless our Scandinavian approach to workwear, we are very eager to listen and adapt to the requirements and requests from not least the European market where we grow fast and have a good representation.

Here is a value-packed catalogue of over 160 pages to browse through. We have reworked the content structure to make it easier to find just the right garment for the right purpose.

Enjoy!

WHEN THE WORKCLIMATE IS CHANGING. SO ARE WE.

We always made a fuss of our Scandinavian origins. Partly because we believe that we have some natural advantages that we benefit from and disadvantages that challenges us to become better.

One advantage is a skilled and expensive workforce and a general attitude and tradition that it must be protected with good garments. Time and efficiency is money and you do not have a lot of replacements to throw in in case of injury or illness due to inadequate clothing.

A disadvantage is of course the extremely unpredictable weather and the precipitation, be it rain or snow, that is abundant all year. Temperatures range from +30°C to -30°C. Winds come from the Atlantic or from Siberia.

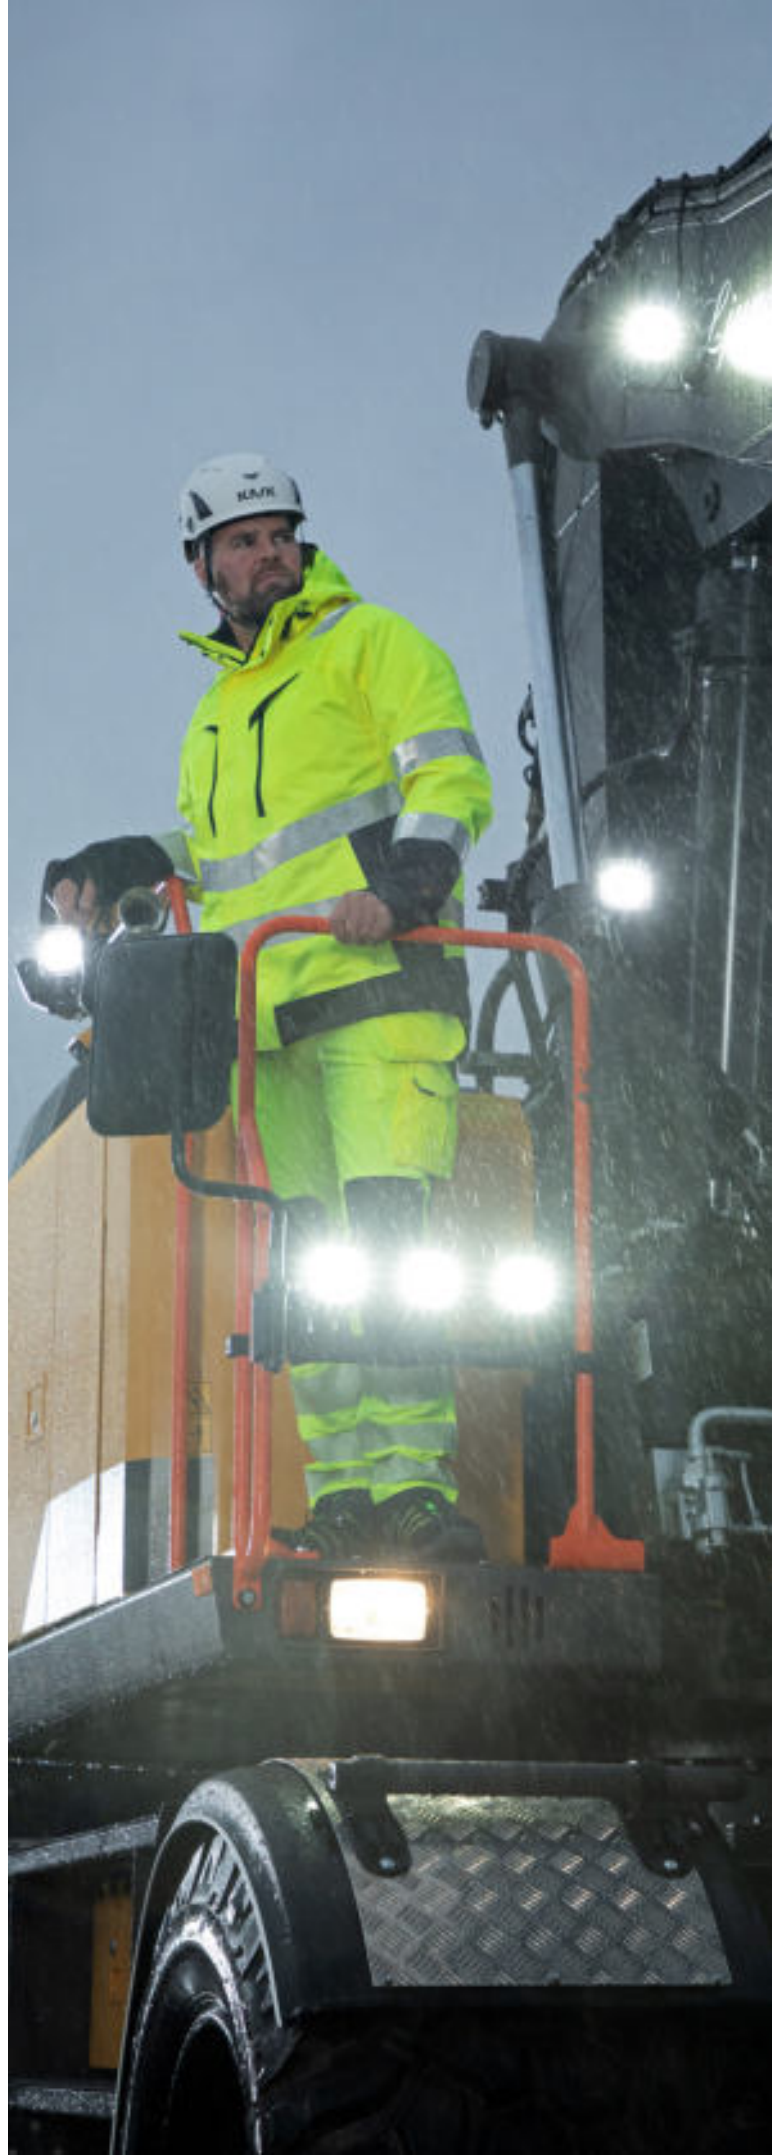

We have to cover all these situations.

WHEN TECHNOLOGY IS DEVELOPING. SO ARE WE.

Maybe it's because our roots was in the outdoor clothes business branch, which was always more keen to test new fabrics and new design. Workwear was kind of conservative for a long time. PROJOB designer and co-founder Tore Parment was not burdened by that conservative mindset when he left a Swedish outdoor brand for starting up a workwear concept in 1998.

Technical garments and fabrics has since become commonplace in the workwear trade, but we work hard to stay in the front edge of development and we claim that we succeed well.

Now we want you to assess our claim.

YOU RELY ON QUALITY. SO DO WE.

Every garment from PROJOB is a piece of handcraft, made from quality fabrics, quality components and the knowledge how to use these aspects of quality for durability during a long and hard life where duty calls.

Apart from using the best components available on the market, we also cooperate extensively with brands in our own company group, like Craft Sportswear, world renowned for the 3-layer principle, their underwear and functional sportswear used by many national teams in skiing, skating, biking and other endurance sports. Another example is Seger, large producer of technical sports and outdoor socks, and Termo, specialized in cold weather underwear.

Read more about our suppliers on page 156.

YOU EXPECT SUSTAINABILITY. SO DO WE.

Again, it is all in the details. By sourcing responsibly, by transporting efficiently and with awareness of where sustainable gains can be made, by focusing on products that are built for a long lifespan, and by cogging into the recycling process to extend product life beyond the time of utility, we can meet your and our own expectation.

We are fortunate to be part of a company group that decided long before the mainstream to focus on CSR and sustainability. This makes it easier for PROJOB. We already live in an aware organisation with a mindset that has transformed to action.

Read more about our sustainability work on page 154.

ENHANCED BRANDING SERVICE

Currently, in Sweden and Belgium, we offer our clients online ordering apps and branding directly at the warehouse. Deliveries are made directly to the worksite.

SO WHAT ELSE IS NEW? HERE ARE SOME 2024 HIGHLIGHTS.

We focus a lot on workclimate in our 2024 range. It is about keeping out moisture and cold, but also about a dry and comfortable feel closest to your body. Garments without gaps, without chafing seams.

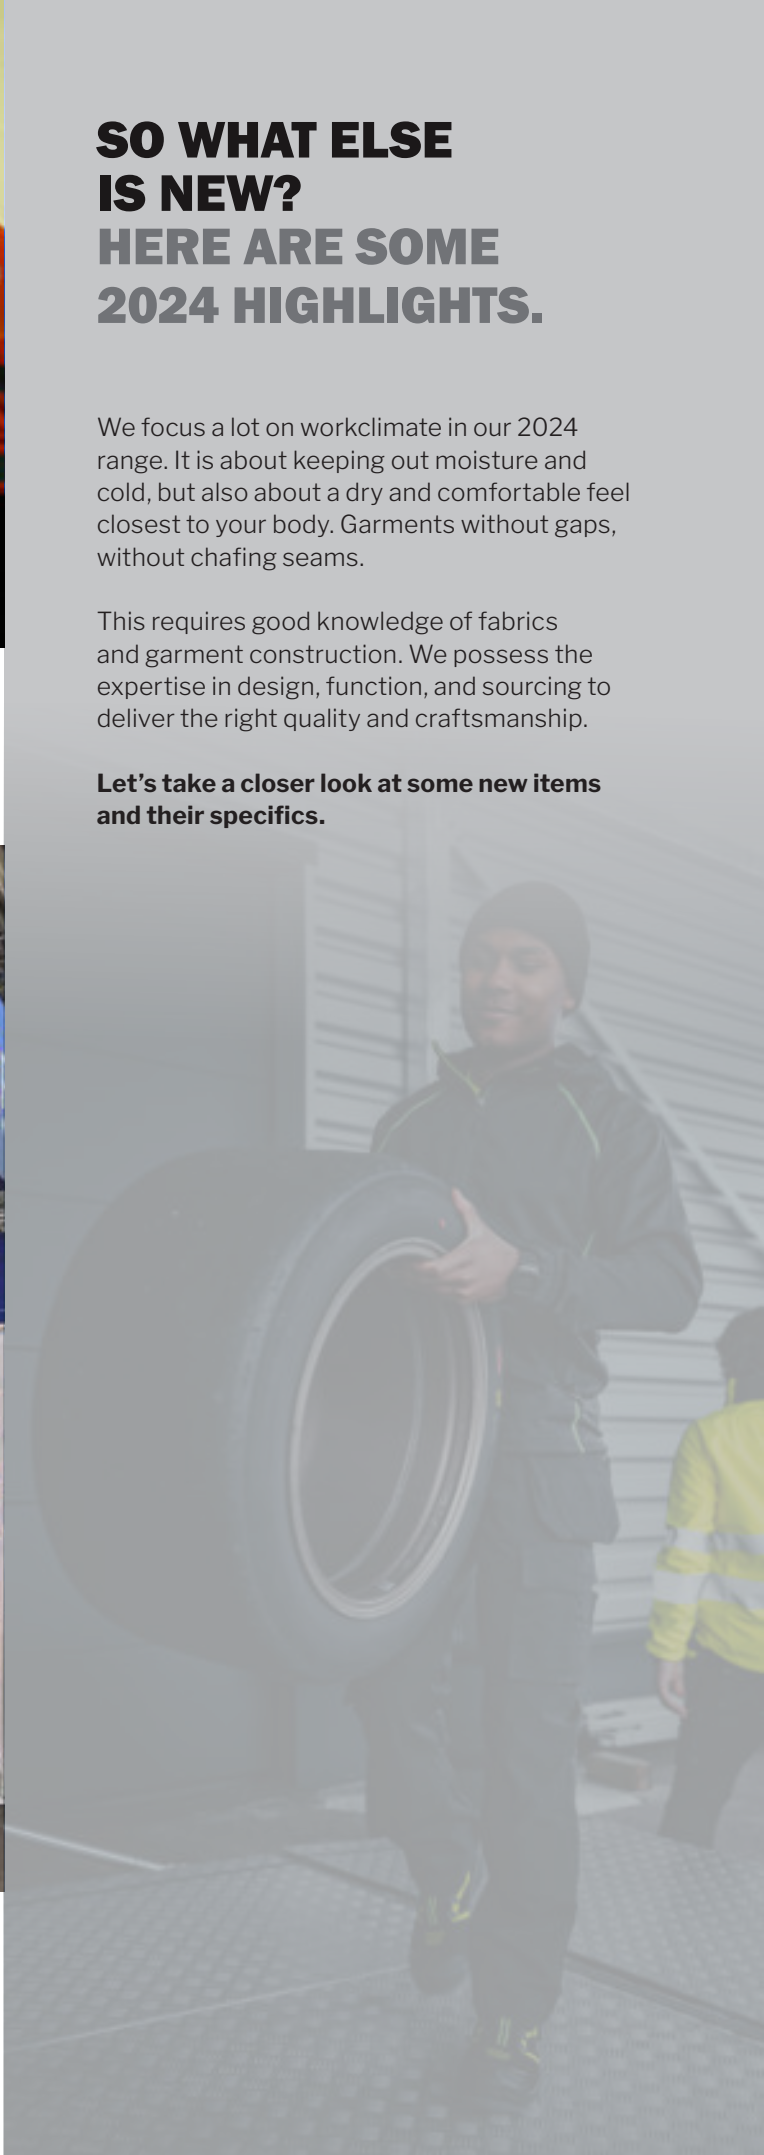

This requires good knowledge of fabrics and garment construction. We possess the expertise in design, function, and sourcing to deliver the right quality and craftsmanship.

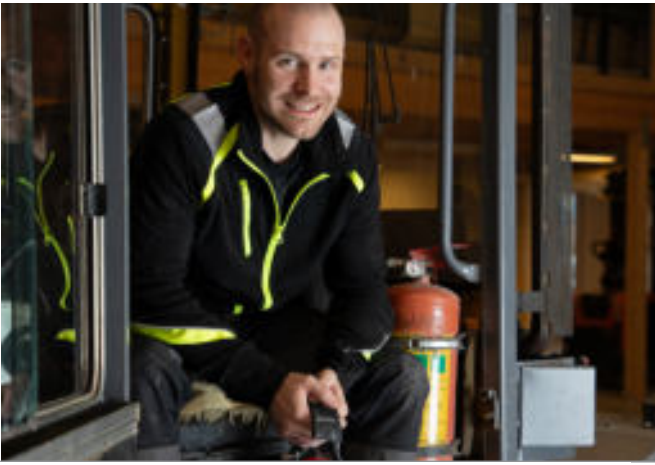

Let's take a closer look at some new items and their specifics.

A PROPER MARKET INTRODUCTION

Our own stand at A+A Fair in Düsseldorf in October 2023 was a new and pleasant experience with a very direct contact to the international market.

REALITY CHECK

2328 MICROFLEECE JACKET [PAGE 50]

When we designed 2328 we decided to give it the features of a layer 3 garment by adding high visibility and reflective details.

We know from reality check that although microfleece typically is a layer 2 fabric, it is frequently worn without an outer garment. We design for reality, so we adapt.

The core quality of microfleece is a soft and flexible weave from polyester which is breathable and moisture-wicking. With a close-fitting body, it is extremely comfortable and it gives you high freedom of movement. This is probably the reason for its high level of use in extreme sports.

VENT POINTS

3319 MICROFLEECE SWEATER [PAGE 51]

We went deeper into developing new microfleece garments and decided to focus on a garment with enhanced ventilation capacity.

On 3319 we added ventilation mesh panels on the sides and in the neck. Thus we created functionality for workers with excess body heat and/or for work in a humid environment. The jackets also have an arm pocket, which is a very practical feature when working without a jacket or, which can be recommended, with a softshell vest.

ROUGH WORK RIPSTOP

5430 SHELL JACKET [PAGE 41]

We often design jackets with a high level of design and visual detail, yet there is also a steady demand for more plain jackets with a built-in functionality that does not reveal itself until it is needed.

5430 is such a jacket. Made for rough use and foul weather, with ripstop weave, taped seams and a lot of smart pocket solutions, including internal fixture for ID card. It can be adjusted in a number of ways to keep wind and water out. Plain yet stylish, functional and highly durable.

WORK MICROCLIMATE

NEW UNDERWEAR AND REINFORCEMENT [PAGES 88-89]

Thanks to our previous success with layer 1, our functional high performance underwear is in higher demand than ever. This encourages us to design and market a new uncompromising line this year. Chances are high you will love it.

PROJOB

PANTS CONSTRUCTION

Primarily it is all about enhanced durability: Our construction collection takes it to new standards. Reinforced Kevlar® panels and details, Coats® Epic threads and seams that can take the daily wear and tear. It's proven through elaborate testing.

Secondly, beneath it all, we have all the regular ProJob characteristics: The functionality in terms of practical and innovative unique details like our pants' knee protection pockets that adjust very well to movement and can be washed with the cushions still inside. Comfort meets comfort, so to speak. Stretch panels add further mobility to the wearer.

If it's going to be tough, it's got to be PROJOB!

Don't forget
kneeprotectors!

PANTS TRANSPORT & INSTALLATION

Flexible and soft fabrics such as stretch and softshell, with discretely integrated vents are essential functions to take everybody working with service and transport through the workday.

For drivers, we strongly advocate the removal of unnecessary pockets like seat pockets. If they contain things it can distress the spine and the pocket seams wear cause friction on the chair/seat fabric. We provide pants with no back pockets!

PAINTERS

This category of workers are distinguished by white garments, simply because the overwhelmingly prevailing color they work with is white and the stains will not show. It also facilitates the use of stronger washing chemicals without visibly bleaching or discolouring the garment's colour. The dense fabric also blocks colour and putty from bleeding through.

Like in all other categories, we add stretch where needed to provide functional and good looking workwear.

ORSSTROM

JACKETS, SWEATSHIRTS & T-SHIRTS

Combine your waistpants from chapters Construction and Transport / Service with a nice looking t-shirt, sweatshirt and jacket for a complete PROJOB look.

All the reinforcements united in one full-packed chapter for improved overview. When gathered, it becomes obvious how much our collection covers in terms of functionality and how many versions there are in the different styles.

There is a Swedish idiomatic expression, "It's hard to see the forest for all the trees", and this is the reason we rearranged our most important product group separately in this catalogue".

All jackets and sweatshirts united in one full-packed chapter for improved overview.

HIGH VISIBILITY EN ISO 20471

Guide EN ISO 20471

Reflective clothing is personal protective equipment. Personal protective equipment are products that are designed to be used by a person for protection against health and safety risks.

The special demands placed on personal protective equipment in Europe are described in EN-norms. Products that pass these basic safety requirements are allowed to carry the obligatory CE-mark. In order for a safety product to be approved and marked with the CE mark, it must have been tested and certified by an authorized organisation.

HIGH-VIS CLOTHES FOR PRO USERS

These have to be CE-marked and approved according to the norm EN ISO 20471 (earlier EN 471). The norm describes among other things what colours are permitted, where on the clothes the reflecting material is to be placed, and which information that must accompany the clothes. The design of the clothes must also follow certain criteria in order to achieve the best possible visibility. In the norm there are three classes. The norm specifies how much fluorescing cloth and how big the reflective area reflective clothes of each class must have.

Minimum area with high visible material, m²

	Class 1	Class 2	Class 3
Background material	0,14	0,50	0,80
Reflective material	0,10	0,13	0,20

Class 1

This gives the lowest level of protection. The total fluorescent area must be at least 0.14m² and the reflective area 0.10m². May only be used if there is little contact with a few vehicles and/or slow moving traffic.

Class 2

Gives a much better protection than class 1, especially in daytime, twilight and fog. The total fluorescent area must be at least 0.50m² and the reflective area 0.13m². Class 2 is used in harbours, on railways, building sites, parking places, cross country searches, load bearing vehicles and other places where class 3 is not required.

Class 3

This gives the highest level of protection. The total fluorescent area must be at least 0.80m² and the reflective area 0.20m². To be used in the proximity of fast moving traffic.

Colors: yellow-10, orange-17
Size: XS-4XL
Certification: EN ISO 20471 Class 2

CORDURA®

FUNCTIONAL CLOTHES & UNDERWEAR

Guide EN 343

Clothing that carries an EN 343 certification is tested for protection against bad weather.

The latest version of EN 343:2019 involves testing seams for water penetration in classes 1-4 and resistance to water vapor classes 1-4, with 4 being the highest class. The garments must achieve results on both tests to be labeled with the EN 343 symbol.

- Protection against ingress of water: 1-4, where class 4 gives the best waterproofness
- Water vapor resistance (breathability): 1-4, where class 4 provides the best breathability
- Effect of high pressure water drops from above (this is optional)

The results are affected by the construction of the garment, where an unlined garment can achieve EN 343 4/4 while a lined garment with the same outer fabric (but with a lining that affects the penetration of moisture) only achieves EN 343 4/1.

The previous standard only had 3 classes, these have now been expanded with a fourth class that requires a higher result. Garments certified according to EN 343 continue to apply. PROJOB Workwear will continuously update certified garments.

Water resistance (WP)

- Class 1 ≥ 8000 Pa
- Class 2 ≥ 8000 Pa material after pretreatment
- Class 3 $\geq 13,000$ Pa material after pretreatment
- Class 4 $\geq 20,000$ Pa material after pretreatment

Water vapor resistance (Ret)

The breathing function is indicated in RET value. At a lower RET value, the better respiratory function.

- Class 1 Ret > 40
- Class 2 $25 < \text{Ret} \leq 40$
- Class 3 $15 < \text{Ret} \leq 25$
- Class 4 Ret ≤ 15

UNDERWEAR

Inside and out

Underwear in three different qualities, one for every situation.

Yellow themed underwear is for everyday wear.

Orange are advanced underwear with body mapped climate zones for excellent body temperature, during maximum performance.

Red is for our warmest quality made of merino wool, that keeps you warm under the toughest cold.

Neither of our underwears has got side seams to prevent chafing and irritation!

PRIO. SERIES.

PRIO. That's short for Priority. When you still want the plain basic quality and function but are ready to give up some other aspects of what workwear offer in abundance today.

If you leave out one out of many pockets, if you move a seam or leave out a loop: It all affects the cost. When we created PRIO we gave priority only to the necessities and left out many of the "good-to-haves". What we got is durable and functional garments for a lower price. Something many companies look for and we are happy to offer.

JACKETS FOR ALL WEATHER CONDITIONS

We highlight four PRIO jackets on this spread: Two with High Visibility, one with lining, one without. And two solid colour jackets with reflex details, also with or without lining.

Additional functionality for all items are detachable hoods, adjustable waist/cuffs and water tightness, as all jackets are certified according to EN 343, the standard certification for wind and water resistance.

Wind- and waterproof with sealed seams

Certified according to EN 343

HIGH VISIBILITY EN ISO 20471

Guide EN ISO 20471

Reflective clothing is personal protective equipment. Personal protective equipment are products that are designed to be used by a person for protection against health and safety risks.

The special demands placed on personal protective equipment in Europe are described in EN-norms. Products that pass these basic safety requirements are allowed to carry the obligatory CE-mark. In order for a safety product to be approved and marked with the CE mark, it must have been tested and certified by an authorized organisation.

HIGH-VIS CLOTHES FOR PRO USERS

These have to be CE-marked and approved according to the norm EN ISO 20471 (earlier EN 471). The norm describes among other things what colours are permitted, where on the clothes the reflecting material is to be placed, and which information that must accompany the clothes. The design of the clothes must also follow certain criteria in order to achieve the best possible visibility. In the norm there are three classes. The norm specifies how much fluorescing cloth and how big the reflective area reflective clothes of each class must have.

Minimum area with high visible material, m²

	Class 1	Class 2	Class 3
Background material	0,14	0,50	0,80
Reflective material	0,10	0,13	0,20

Class 1

This gives the lowest level of protection. The total fluorescent area must be at least 0.14m² and the reflective area 0.10m². May only be used if there is little contact with a few vehicles and/or slow moving traffic.

Class 2

Gives a much better protection than class 1, especially in daytime, twilight and fog. The total fluorescent area must be at least 0.50m² and the reflective area 0.13m². Class 2 is used in harbours, on railways, building sites, parking places, cross country searches, load bearing vehicles and other places where class 3 is not required.

Class 3

This gives the highest level of protection. The total fluorescent area must be at least 0.80m² and the reflective area 0.20m². To be used in the proximity of fast moving traffic.

ACCESSORIES

They are small but important.
Details to make an outfit or a garment complete:
Knee pads, detachable pockets, belts and more. All
made to fit our concept in both functionality and
colour.

THE IMPORTANCE OF USING KNEE PADS

Prevent injuries: Knee pads help stabilize the knee and reduce the risk of injuries, such as ligament injuries, meniscus injuries and knee injuries.

Increase performance: Knee pads provide support and stability, which can help improve performance during physical activity.

Relieve pain: Knee pads can help reduce pain and inflammation in existing knee injuries.

Increase comfort: Knee pads can provide support and warmth, which can make it more convenient to be active.

When to use knee pads depends on individual needs and situations. Knee pads can be a good idea for people who are active and expose their knees to stress, for example construction workers or others who perform physically demanding work. Also for people who have an increased risk of knee injuries, for example people with obesity, arthritis or other knee injuries. Has existing knee injuries that need support and stability.

Knee pads should be comfortable to wear and provide the support and stability you need.

How do you choose the right knee pads?

Determine the type of knee protection you need. There are knee pads that provide support, stability, warmth or a combination of these. Measure your knees before buying knee pads. Knee pads should be tight fitting, but not so tight that they are uncomfortable.

Get the help of an expert if you are unsure about the type of knee protection you need.

ID-CARD HOLDER 5-PACK

ID-card holder to be attached with a carbine hook or brace clips. Sold in 5-pack.

Quality:
Colors: black-99
Size: ONE SIZE

A photograph of an industrial facility, possibly a factory or refinery, with a strong blue color cast. The image shows a complex network of metal structures, pipes, and walkways. The ground is a light-colored, textured surface, possibly concrete or gravel. The overall scene is industrial and somewhat desolate.

SUSTAINABILITY

We have the possibility to contribute and make a difference through our global operations. PROJOB is a part of New Wave Group. New Wave Group is working with social and environmental sustainability under the term CSR (Corporate Social Responsibility). As our customer, you are supporting this work.

New Wave Group has two main strategies to decrease our environmental impact and to cut our emission of greenhouse gases. First of all, we must influence the transportation companies that we are working with. Our membership in “Clean Shipping Index” aims to impact the shipping companies to use cleaner vessels by ranking the most high-performing ships. The Group works with some of the largest transportation companies on the market, all of which have environmental programs in place for their operations.

Secondly, we always strive to improve our internal logistics and work methods. Within our group of companies, we club together as much as possible of our shipments and transportations. In addition to protecting the environment, sustainable solutions can also contribute to the streamlining of our operations.

WE LIKE SUSTAINABLE PRODUCTS

New Wave Group believes in classic design and good quality products - a concept that will never be out-of-fashion. We hope you will enjoy our products for a long time. All products can be customized to your precise demand, which is a good way to ensure long-lasting use and sustainable consumption.

It is important to New Wave Group that our products are safe and free from restricted chemicals. New Wave Group is a member of the Swedish Chemicals Group at Swerea IVF to receive the most updated information on legislation and developments. This supports our active work to reduce and replace chemicals in line with best available technique. All our suppliers must follow the requirements in our Restricted Substance List. The list has been designed in accordance with legislations such as REACH, but also taking into account industry recommendations and standards. As a result, our requirements are often stricter than the applicable legislation.

Learn more about our Code of Conduct and our sustainability work on New Wave Group’s webpage: www.nwg.se/en.

IMPROVING WORKING CONDITIONS

New Wave Group is never far away from the manufacturing of our products. Being represented on site enables us to have a close partnership with our suppliers and to actively monitor their business operations. We have a CSR-team, which consists of full-time staff dedicated to visit our suppliers, monitor and support them with various social and environmental topics.

As a member of BSCI, New Wave Group has adopted the BSCI Code of Conduct. It contains requirements on minimum wage, working hours and the prohibition of child labour, among several other requirements from international conventions like to ILO Conventions and the Declaration of Human Rights. New Wave Group has a commitment towards BSCI to engage our suppliers in third party examination by independent auditors. Having both internal and external audits is a quality assurance to us. We strive for constant improvements and continuous development.

New Wave Group is a signatory member of the pioneering Accord on Fire and Building Safety in Bangladesh. The Accord is a binding contract between brands, international and local trade unions and NGOs. Its aim is to make all garment factories in Bangladesh safe workplaces, which includes a program of safety inspections and a commitment to ensure that the necessary repairs and renovations are carried out. The Accord will have significant impact on the daily lives of millions of textile workers in Bangladesh. We are proud to be a part of this project!

GUIDE

MATERIALS

VENT AIR® is wind and waterproof with breathability. VENT AIR® keeps the body dry and cool while protecting against the forces of weather. The material consists of three-component high-tech weave, a functional material with a coating on the inside and a water-repellent treatment on the outside.

Cordura® is DuPont's brand of extremely durable polyamide material. It is three times as strong as standard polyamide, up to seven times as strong as cotton and yet is fine and supple. We use it primarily as reinforcement in places that are exposed to hard wear.

YKK is a market-leading brand in zippers. The products are of high quality and set the standard for other players in the market.

3M Scotchlite™ person reflex material makes you extra visible when it's dark and the view is bad. The material reflects bright white when it's lit up by the headlights of a vehicle, also when the wearer stands beside the road. 3M Scotchlite reflex material for protective garments exceeds the highest reflex category of the European standards for reflective protective garments EN ISO 20471, as well as all strict, standardised tests.

Coats Epic has set a new standard in the thread market. It consists of a core of polyester fibre around which is spun yet another polyester fibre. The combination makes for a thread with maximal tensile strength, which results in seams with extreme durability.

Duraflex is the trade mark of the high-quality buckles used in PROJOB clothes, belts and carrying systems.

PrimaLoft® is a brand of patented synthetic microfiber thermal insulation material, originally developed for military use.

CRAFT® is a world leading producer of functional sports apparel and innovative supplier of three-layer-principle garments. Craft provides the fabrics and know-how to our workclimate underwear.

Materials with 37.5°-technology help to keep your body at the ideal temperature 37,5°C. The material contains naturally active particles, permanently embedded in the fiber which, when you get hot, removes sweat in the vapor stage before liquid sweat forms. 37.5° is a trademark of Cocona, Inc.

CRAFT® 

COTTON

Cotton is a soft and comfortable natural material. It insulates and ventilates. One of cotton's advantages is that it does not melt when exposed to flames and sparks and that it is difficult to set fire to. Our heavy-duty cotton twill is extra sturdy and durable. This is possible because we ourselves are involved in and direct development from fibre to final production.

POLYESTER/COTTON

The combination of cotton and polyester have proven perfect for making long-lasting garments. The breathability of cotton combined with the durability and colourfastness of polyester make garments in polyester/cotton keep their shape and colour longer. Clothes in polyester/cotton are therefore an excellent choice for hard work that places great demands on both the wearer and the garments.

SPUN DYED

Using the traditional dyeing method, the finished fabric is dipped in a dye bath, before being rinsed and then dried. With the spun dyed process, the colour pigment is added before the fibre is spun and the fabric subsequently woven/knitted.

In this way the colour becomes part of the fibre. The woven/knitted fabric achieves much better colour fastness, making it better able to withstand washing, wearing, sunlight and bleaching.

In environmental terms, spun dye is much more eco-friendly than the traditional method of dyeing. As it eliminates a stage

ProDry™ are the materials you wear closest to your skin. They transport moisture and allow it to pass to the outer layer. With ProDry™ there you don't have to have damp and cold garments next to your body.

Pro Thermal™ are the materials that afford effective insulation against both heat and cold. The materials detect and dispose of surplus heat at the same time that they keep out unneeded cold. Pro Thermal™ keeps body temperature at an even and pleasant level all day.

Pro Vent™ are the materials with high breathability. They let out moisture and superfluous heat. They withstand rain, snow and wind. Pro Vent™ are resilient, protective materials worn on the very outside.

Pro Tec™ are the materials that afford effective protection against exterior effects. They are very resistant to wear and to tearing. Pro Tec™ is suited to extremely strenuous work in rough environments.

WASHING INSTRUCTIONS

WASHING

All our garments are properly tested. Each of them has its own washing instructions, and it's important to follow these. If a garment is always washed with similar colours and at the recommended temperature, it will stay good looking for longer.

If the label says Wash separately in the washing instructions, this means that the colour of the fabric may run – for these garments, which may initially have a little extra dye, it is particularly important to follow the washing instructions to not harm any other garments.

PREWASH

Use the same amount of detergent as in the main wash cycle when prewashing very dirty clothes, skip the prewash cycle completely for less dirty garments to save water and energy. Soaking garments is not recommended due to the damage which undissolved detergent can do to fabrics.

DETERGENT

Always be sure to use the correct amount of detergent – use the detergent packaging as reference. Choose a bleach-free detergent which is suitable for the temperature of the wash.

DRYING

Only tumble dry as a last resort – if you have enough time and space, hanging garments out to dry is recommended as this is better for your clothes. Smooth out the fabric and the seams before hanging up a garment. When tumble drying, the garment should never be completely dried, as this causes unnecessary wear and can cause shrinkage.

CHOOSE SIZE CAREFULLY

Size is extremely important when it comes to work clothes – it affects function, wear and ergonomics. PROJOb clothing is designed with flexibility in mind. Clothes that are the wrong size prevent the wearer from moving around freely. Pockets and other functional details which are used repeatedly during the working day need to be positioned where they can be reached easily. If the clothing is the wrong size, either the positioning of the pockets will force the wearer to make strenuous movements, or the pockets will serve no purpose at all. It's also extremely important for the knee protectors to be in the right place to prevent unnecessary wear. The size also affects how long clothes last – the tighter the garment, the greater the strain on the seams and the fabric.

The PROJOb collection includes sizes to meet every need. Almost all our tops are available in XS–4XL and almost all our trousers are available in C44–C62, D84–D120 and C146–C156.

	Shows the recommended wash temperature		Do not tumble dry		Do not iron
	Delicate cycle		Tumble dry on low heat (50°C)		Professional leather clean
	Do not use chlorine bleach		Cool iron –110°C max, suitable for nylon		Do not wring
	Dry-clean, but do not use chemicals stronger than perchloroethylene		Cool iron –150°C max, suitable for polyester/cotton		Hand wash only
	Do not dry-clean		Cool iron –200°C max suitable for cotton
